BTEA Contractors:

We would like to make all of our Contractor members aware that the New York City Council is currently considering a Bill that would extend the final deadline for LL196 training.

This bill would extend the full compliance date for Local Law 196 (that is, the final 10 hours of training) for worker site safety training card requirements from September 1, 2020 to March 1, 2021.

While this change in the compliance date is not yet law, it is the BTEA's understanding that the Council has a favorable disposition towards this proposed change. We will keep you informed of upcoming changes to LL196.
